PROFILE Computer Security undergraduate at UTeM seeking a cybersecurity internship. Hands-on project experience in biometric access control, Windows Server DNS and C++ applications, supported by prior IT troubleshooting and documentation experience.

EDUCATION

Bachelor of Computer Science

COMPUTER SECURITY

Universiti Teknikal Malaysia Melaka (UTeM)

Oct 2024 - Mar 2028

CGPA 3.36

Diploma in Information Technology

POLITEKNIK BALIK PULAU

Aug 2020 - Sep 2023

GPA 3.69

TECHNICAL SKILLS

SECURITY AND NETWORKING

DNS, Windows Server, fingerprint authentication, access logging

PROGRAMMING AND DATA

C++, SQL, MySQL, HTML, CSS, JavaScript

HARDWARE AND TOOLS

Arduino, ESP32-CAM, Visual Studio, GitHub

IT SUPPORT

PC and laptop troubleshooting, hardware upgrades, data backup, remote support

ACTIVITIES

Chess Club and Esport Club

Politeknik Balik Pulau

INTERNSHIP EXPERIENCE

IT Intern | PHILI-ORIENT Logistics

KEDAH, MALAYSIA | MAR 2023 - AUG 2023

- Identified data-entry errors and related issues, and reported them to supervisors for resolution.
- Researched and requested missing information to complete documentation.
- Troubleshoot hardware problems on PCs and laptops.
- Provided remote troubleshooting and resolved hardware issues escalated by customer support.
- Replaced hard drives and motherboards, and upgraded system memory.
- Helped customers back up data before upgrading older computers.

SELECTED PROJECTS

IoT-Enabled Smart Home Security

ARDUINO | ESP32-CAM | BIOMETRIC ACCESS

- Built a fingerprint door-access prototype with automatic relocking and authentication-attempt logging.
- Integrated image capture and Telegram alerts after three consecutive failed authentication attempts.

Clubhouse Management System

C++ | MYSQL

- Developed a console application for registration, facilities, bookings, payments, receipts and sales reports.
- Implemented capacity checks, input validation and resident-discount calculations.

Windows Server DNS Lab

WINDOWS SERVER | DNS

- Configured forward and reverse lookup zones and DNS records, then tested client-side name resolution.
